Anandkumar292000@gmail.com · <https://www.linkedin.com/in/anand-kumar-51b521194> ·

Dedicated software engineer with experience of about 3 years and expertise in backend development using Java and Spring / Spring Boot Framework, Node JS, Angular JS and frontend technologies including HTML, CSS, JavaScript, and ReactJS. My experience include other skills as well including Git, CI/CD, Docker, Kubernetes, RESTful APIs. Proven track record of enhancing digitalization and reducing reliance on traditional data storage methods through innovative web applications. Certified in AWS Cloud Foundations and Data Analytics with Python, with strong skills in cloud services and data analysis. Passionate about continuous learning and contributing to impactful projects and initiatives.

EDUCATION

JUNE 2023

B.TECH, AMITY UNIVERSITY

Scored 7.52 CGPA.

EXPERIENCE

JULY 2023 TO OCTOBER 2024

MINDA CORPORATION LIMITED, SPARK MINDA GROUP

WEB DEVELOPER

- Developed web applications facilitating digitalization and reducing reliance on Excel sheets for data storage.
- Utilized Java with Spring framework for backend development and HTML, CSS, JavaScript, jQuery, JSP, etc., for frontend development.
- Implemented AJAX for frontend-backend communication and HTML emails for notifications via Office365 SMTP server.
- Employed Tomcat 9.0 for project hosting and MySQL 8 database for data storage.
- Led or contributed to the completion of 3 projects.

NOVEMBER 2024 TO NOW

TRUECHIP SOLUTIONS

JAVA DEVELOPER

- Deployed about 5 modules to digitize processes for client based on requirement.
- Deployed multiple automated system generated mailers as per customer requirements using the node mail service.

SKILLS

- **Technical Skills-**
 - Programming Languages: Java, Spring Framework, C, C++, Python
 - Database: MySQL, MongoDB, PostgreSQL
 - Frontend Languages: JavaScript, HTML, CSS, jQuery, Bootstrap
 - Technologies: Node JS, Angular JS, React JS, Nginx
 - Others: Maven, AWS Cloud, Docker, Kubernetes, RESTful, CRUD

PROJECTS (UNDERTAKEN DURING B. TECH)

AUTOMATED CHALLAN SYSTEM

Developed an Automated Challan System using Java, SQL, and JDBC for backend processing, and HTML, CSS, and JavaScript for the frontend interface. The system streamlined the creation and management of challans, reducing manual errors and improving efficiency. Integrated real-time data updates and validation to ensure accuracy and reliability in transactions.

FACIAL EXPRESSION DETECTION

Developed a Facial Expression Detection system using Python and its libraries, including OpenCV, TensorFlow, and Keras. Implemented deep learning models to accurately identify and classify various facial expressions from real-time video feeds and images. Enhanced the system's accuracy by training on extensive datasets and fine-tuning the model parameters. Utilized OpenCV for efficient image processing and TensorFlow/Keras for building and deploying the neural network model.

PROJECTS (UNDERTAKEN AT SPARK MINDA)

ECRN SYSTEM

Developed an Automated tracking, approval and recovery tracking system to ensure smooth processing of change request raised by the customers of the company. I have successfully deployed among the 3 Verticals dealing with different products having different process of completion.

RECOVERY TRACKING SYSTEM

Developed and deployed this tool independently to track and monitor the amount recovery from the customer to ensure smooth process. This tool include dashboard, notifications etc..

ACTIVITIES

JANUARY 2022 TO APRIL 2022

STUDENT VOLUNTEER, EK PEHEL B R MEMORIAL WELFARE SOCIETY

- Contributed to child education, women empowerment, and healthcare initiatives.
- Recognized for significant contributions to NGO goals.

CERTIFICATIONS

OCTOBER 2022

AWS ACADEMY GRADUATE - AWS CLOUD FOUNDATIONS, AWS ACADEMY

Acquired comprehensive knowledge about AWS Cloud and its essential services, including EC2, IAM, VPC, Route 53, CloudFront, EBS, Lambda, EC2 Auto Scaling, Elastic Load Balancing, CloudWatch, etc. Successfully completed various hands-on labs and modules to gain practical expertise in utilizing these services effectively.

<https://www.credly.com/go/4Oco83jJ>

JANUARY 2022 TO APRIL 2022

DATA ANALYTICS USING PYTHON, NPTEL

Acquired expertise in data analysis techniques using Python programming language. Developed proficiency in various statistical methods including probability theory, regression analysis, and more. Demonstrated the ability to apply these techniques to extract insights and make data-driven decisions effectively.
